

R22array lighting system

R22array lighting system is new design of in 2024. We bring the lighting back to simple, and use the modular design to make lights easy to install and replace. Use the light points and track poles to make different designs according to varied lighting scenes. It is with our DC24V electric circuit same as previous R26 system, can be dimmable with Triac/0-10V/Dali/Tuya. Due to the modular design, Can be flexibly installed in different scenarios,, Structure can be disassembled design, we will save a lot of packaging materials, ckage to realize the environmental protection

LIFE IS
SIMPLE
LIGHTING IS SIMPLE

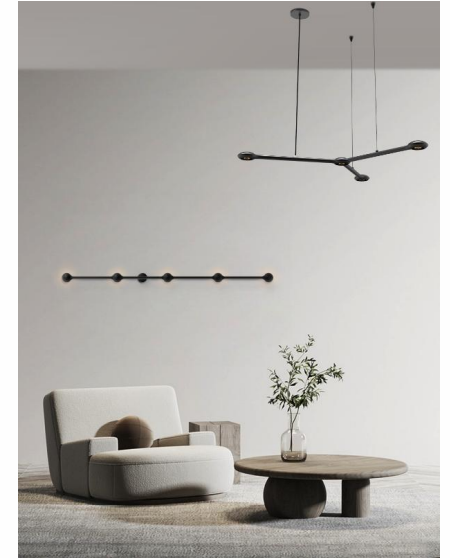

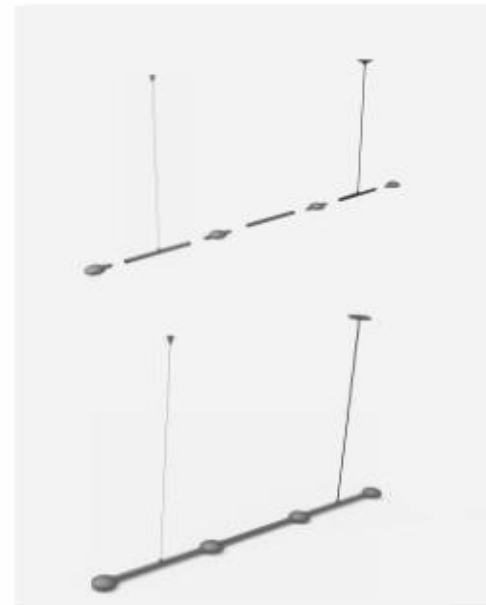

STRAIGHT

Line is always the most classic style in lighting. Different from decorative lamp, the modular parts brings different effects on ceiling and wall, to creates a refreshing atmosphere. Widely used in home .

TRACK

INSTALLTION

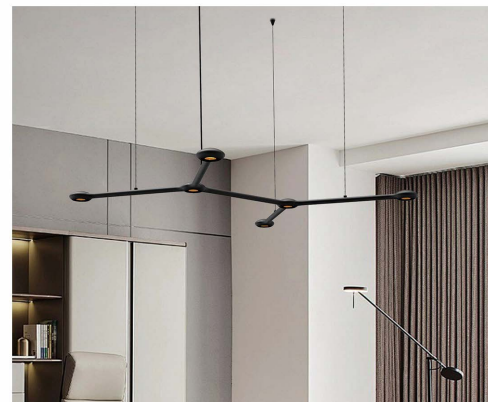

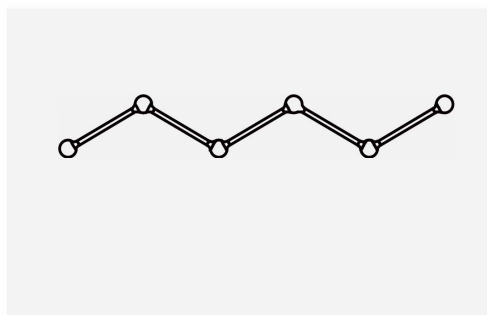

WAVE

A flexible design, no limit on straight line anymore. The idea is to give the lights the ability to turn arbitrarily, making the corners brighter. It is a better choice to decorate the whole wall.

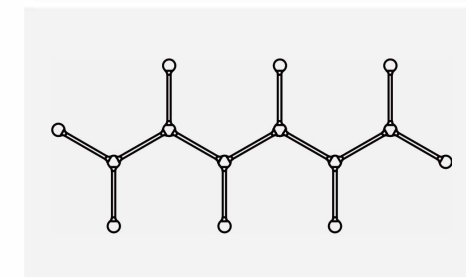

TRACK

FURCATION

It is growing. Due to the modular design, the pole connect the light point to each direction. It has more possibilities in different application scenarios, can be small for home using, or can be longer for office, or can be any other design you want.

TRACK

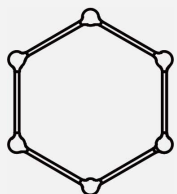

INSTALLTION

HEXAGON

It is the basic design and mostly used as a pendant light. This is a new modern design and offer a new option for home lighting. It uses different optics to create soft or concentrated lighting effect.

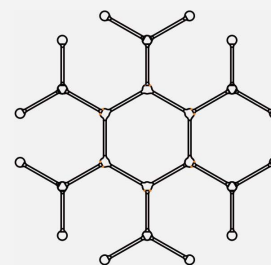

TRACK

INSTALLTION

TRACK

SPREAD

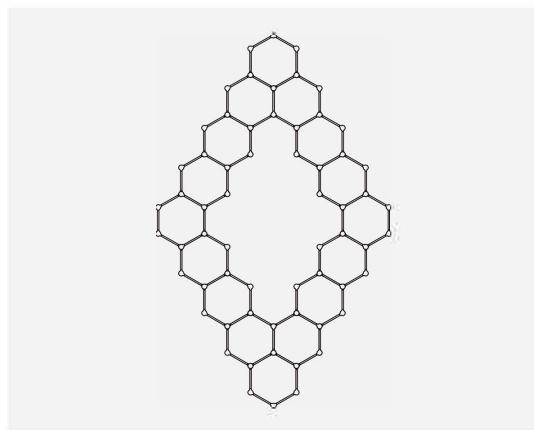

It is usually used in scenes with large space. No matter how large the room is, this system can be assembled and extended to the entire room. At the same time, different designs can also be made to beautify the room.

HONEYCOMB

It is a new option for public place, like mall, lobby, corridor, office, gym which request high luminance. Each light point will give high lumen and $UGR < 10$. Meanwhile, it is easy to replace each part if it is necessary.
